

## Rustic Road Revisited

### By March Hotz

The Rustics Revisited drive was wonderful! The weather couldn't have been better and we met a bunch of new members.

Jim and I used **“Riding with GPS”** for the first time, and I would encourage everyone to do so. It gives vocal turn-by-turn drive instructions, as well as allows you to print a "Cue Sheet," which is turn-by-turn instructions that you can print out. You can also download the driving directions to your Garmin.

After playing around with it we found it easy to use. The customer support is superb! I emailed a question to them and within 15 minutes had my answer.

To download the app to your phone, go to the members only section for instructions on how to use "Ride with GPS" and how to download routes into a Garmin. This app is free to members of the Badgerland Miata Club. Please do not share with others.
